

**i2tx-L** this new handset has been totally redesigned with the addition of a bright green, Class 2 <1mW Laser. The handset has been slimmed down and has a better fit in your hand, with a finger notch on the rear ensuring a comfortable fit, whether you are left or right handed.

Two batteries are used; one for the laser and one for the transmitter. This prevents the transmitter battery not being drained by the laser. A low level warning battery indicator now means you can check when to change the transmitter battery.

## Main Features

- <1mW Green Laser
- Dual battery for greater reliability
- 2 (Back & Next) or 3 buttons (with Black) for cueing available
- Battery low indication on transmitter
- Will work with MicroCue2, current MasterCue V5 USB and MasterCue V6
- Dual LEDs
- RF range over 75m open field
- CE, FCC and FDA compliant

## Specifications

**Signals:**  
RF 434.075 MHz  
Laser <1mW 532nm (green)

**Dimensions mm (inch):**  
DxWxH: 130 (4 1/8) x 55 (2 1/4) x 30 (1 1/4)

**Weight:**  
115g/ 4oz

**Power:**  
Standard AA battery for transmitter  
CR2 high capacity 3V lithium for Laser
